PROFESSIONAL SUMMARY

Backend Engineer with 3+ years of experience building and optimizing production Go (Golang) microservices and Gin-based REST APIs for OTT, CMS, sports/media, search, and cloud media processing platforms. Experienced in MySQL schema design, Redis caching, RabbitMQ asynchronous processing, Typesense and Elasticsearch search, Go pprof profiling, production debugging, and multi-cloud storage integrations.

PROFESSIONAL EXPERIENCE

Backend Engineer - Go (Golang) / Backend Microservices | Dec 2022 - Mar 2026

MultiTV Tech Solutions Pvt Ltd | Gurgaon, India

Kutingg - OTT Platform

- Designed and optimized Go and Gin REST APIs for Home, Content Listing, and Content Details modules supporting high-traffic OTT workloads.
- Integrated and optimized Typesense content search, reducing search latency by approximately 40% and improving content discovery.
- Used Go pprof and logs to investigate CPU, memory, and slow API execution paths and resolve production performance issues.

Momentus - Sports & Media Backend Platform

- Built Go microservices from scratch and designed MySQL schemas for sports and media workflows.
- Developed secure Gin REST APIs for authentication, RBAC, match lifecycle, tournament management, and key-moment workflows.
- Implemented Live/VOD scheduling and Aryshare social publishing; integrated RabbitMQ for asynchronous event processing and background jobs.

Art of Living - OTT Platform

- Developed Go and Gin REST APIs for Playlist and Content Management modules.
- Integrated Redis caching, Typesense search, and email notification workflows; used Go pprof to profile and optimize API performance.

Law & Crime - OTT / News Search Platform

- Implemented and optimized Typesense content search for OTT/news workloads, reducing search latency by approximately 30-40%.

Media-Morph - Cloud-Based AI Transcoding Platform

- Built a cloud-agnostic Go backend for AI-based VOD transcoding with integrations across AWS, Azure, GCP, SFTP, and Akamai.
- Designed Gin REST APIs for user management, project workflows, and template-based transcoding pipelines; modeled data in MySQL.
- Integrated RabbitMQ asynchronous processing for transcoding pipeline orchestration and media input/output workflows.

TECHNICAL SKILLS

Languages & APIs: Go (Golang), JavaScript, Gin, RESTful APIs, gRPC, API Design, Swagger / OpenAPI

Architecture: Backend Microservices, Distributed Systems, Asynchronous Processing, Background Jobs

Data & Search: MySQL, MongoDB, Redis, Typesense, Elasticsearch, Apache Solr, Schema Design, Query Optimization

Messaging & Cloud: RabbitMQ, Docker, AWS EC2, Linux, AWS / Azure / GCP Storage, SFTP, Akamai

Performance & Operations: Go pprof, Profiling, Logging, Metrics, PostHog, Production Debugging, Git, Bitbucket

EDUCATION

Master of Computer Applications (MCA) | Jul 2024 - Jul 2026
Chandigarh University - Centre for Distance & Online Education

Bachelor of Computer Applications (BCA) | Aug 2018 - Jun 2021
JEMTEC, Greater Noida - Guru Gobind Singh Indraprastha University
